

# CERTIFICATE

**SySS GmbH**  
72072 Tübingen

herewith confirms to have performed a penetration test at the company

**BubCon Media UG**  
51643 Gummersbach

## Test Object:

The Android messenger "Bubcon" and its back end systems "chat.bubcon.com" and "chatapi.bubcon.com" were analyzed for security vulnerabilities. The main focus was on the validation of the transport security and the end-to-end encryption, as well as basic features.

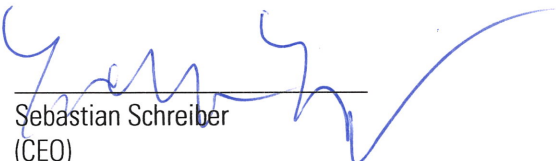

## Summary of Test Results:

SySS GmbH attests that the Android app and the back end systems have a high security level. Above all, it was not possible to break the transport or end-to-end encryption.
